

Guidelines for Safely Dropping Off Donations

If volunteers are scheduled to unload at the site as indicated on your district's tab:

Load items in your trunk and/or back seat.

Wear a mask as you pull up to talk through the window.

Pop trunk if possible to do so without getting out of your car. If not, ask the volunteer to do it themselves or to wait at a safe distance if a driver/passenger must get out to do it.

Volunteers wearing masks and other PPE will take items and close the trunk/door.

If no scheduled drop off times are shown on your district's tab, **CALL the local church or feeding ministry before going. Each will have their own instructions and times available.**
