

VIRTUAL SCAVENGER HUNT

Instructions:

Utilize a video chat technology so you can see all participants and they can see and hear each other.

Announce each item on the scavenger hunt list, one at a time. Then, give participants time to search their homes for that item. Each participant focuses their video camera on the item. Once everyone has found an item, invite participants to share about what they found.

If participants are on video chat with a mobile device, they can take the device with them as they search for the item. If participants are on a laptop, they can search for the item and bring it back to the computer.

You may use some or all of the items listed below or come up with your own list!

Scavenger hunt items:

- Something in the shape of a cross
- Something that brings you joy
- Something that represents something you fear
- Something that represents a talent or gift God has given you
- Something that reminds you that God is with you
- Someone you love

Alternative instructions: Instead of doing this live on video chat, schedule a day and time ahead of time to email/text/share the list of items. Participants must take pictures of the items on the list and email/share them with you by a certain time. The winner is the person who completed everything on the list first.
